

IROC TX6C

The IROC standard transmitter TX6C is a small versatile transmitter. It has a robust design which handles rough conditions without problem. A powerful rechargeable battery guarantees a reliable and trouble free operation. Just store TX6C in the charger when it is not in use, and it will always be ready to use. Together with the IROC standard receiver RX06, the TX6C can be used for winches, tail lifts, industrial doors, mobile applications, and many other industrial applications.

Technical facts receiver

Dimensions	90 x 62 x 19-25 mm
Weigh	86 g
Operating temp	-25° / + 55° C
Storage temp	-40° / + 85° C
Frequency	433.075 - 434.775 MHz
Channel separation	25kHz, 69 Channels
Range	200 – 500 m
Modulation	GFSK
Operating time	min 10h
Charge time	approx. 3h
Power output	1 -8 mW
